Effects of Hard Water

Hard water can :

- Shorten the life of your appliances
- Prevent your clothes from being cleaned properly, no matter how much detergent you use
- Increase your chances of having mineral buildup in your bathroom and kitchen
- Lead to plumbing issues in your home by constricting the flow of water in your pipes

All of these hard water issues can be solved with a Superior Series Water Softener. The life of your appliances will be extended, your dishware will shine, and your clothing will be bright and clean.
