# EXCALIBUR - PREFERRED REVERSE OSMOSIS SYSTEM

Quality through innovation

## Preferred Reverse Osmosis System

The Preferred Reverse Osmosis System from Excalibur Water Systems uses membrane technology to generate high-purity drinking water. This system provides TDS reduction, including numerous chemicals and heavy metals from your water supply, including **lead**, **PFAS**, and **microplastics**, and features convenient twist-lock filters and membrane for easy replacement. This system comes complete with designer faucet, pressurized storage tank and installation fitting kit. Minimum water pressure of 30 psi is required to operate this system.

Removes Chemicals

Easy to Replace  
Twist-Lock Filters

Optional  
Neutralizing Filter

**6 YEAR  
UNLIMITED  
WARRANTY**

\*excluding consumables

Removes Heavy Metals

75 Gallon Per Day  
Capacity

TDS Reduction  
= Pure Water

Removes **Chemicals** and **Heavy Metals** such as:

- Chlorine
  - Benzene
  - Ethylene
  - Copper
  - Nickel
  - Chloramines
  - Chromium
  - THM's
  - Aluminum
  - Cadmium
  - Ammonia
  - PCB's
  - Lead
  - Silver
  - Zinc
- + and many more

Part #	1st Stage	2nd Stage	3rd Stage	4th Stage	L x W x H (in)
EWR 4075	Sediment	Carbon	Membrane	Carbon	15.6" x 4.5" x 15"
EWR 4075A	Sediment	Carbon	Membrane	Neutralizer	15.6" x 4.5" x 15"

# Easy to Replace Twist-Lock Filters

Clean Water. Zero Tools. Zero Hassle.

## What is Reverse Osmosis?

Reverse Osmosis is the process that removes solid substances, minerals, and foreign contaminants from unfiltered or tap water. The reverse osmosis process eliminates chemicals and heavy metals including sediment, and inorganic materials like chlorine, salts, and minerals, also known as TDS or Total Dissolved Solids, lead, PFAS, microplastics, and many more.

## Health Risks

Your water may look clean, but municipal and well water must be treated with harsh chemicals such as chlorine, chloramine, algaecide, and soda ash, to produce tap water. At times these chemicals are more noticeable, and tap water may smell or taste of chlorine, making it less palatable for drinking or cooking. Although tap water is regulated and deemed safe to drink, even small amounts of chlorine and other water treatment chemicals can lead to health issues over time.

Drinking reverse osmosis water helps protect against a variety of ailments such as:

- Colds
- Constipation
- Urinary Tract Infections
- Kidney Stones
- Bladder Cancer

## Choose Excalibur Water Systems

Choose safe, pure water you and your family can depend on with the Preferred Reverse Osmosis System from Excalibur Water Systems; backed by a 6 year unlimited warranty!
