EXCALIBUR - SUREFLO® SMART PURIFIER PLUS

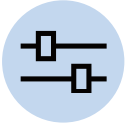

Quality through innovation

SUREFLO® Smart Purifier PLUS Tankless Reverse Osmosis System

SUREFLO® Smart Purifier PLUS is our most advanced tankless RO system yet. This system is equipped with a carbon filter and membrane technology to provide both filtered and purified water. The unit is tankless, supplying on-demand water and continuous flow. The system and faucet provide an outgoing TDS (Total Dissolved Solids) reading for your purified drinking water. The system light indicates when the filter and membrane needs to be replaced, and the 2-stage quick connect filter and membrane provide an easy set-up and installation.

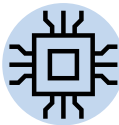

2-Stage Quick Connect Filter
Easy to Replace

Simple Install
and Set-up

Provides Both
Drinking & Purified
Water

System & faucet
provides an outgoing
TDS reading

Water on Demand
+
Large Flow Rate

Removes 99.5%
of contaminants

Better Pump
=
Low Noise

Continuous water
quality monitoring

Part #	1st Stage	2nd Stage	L x W x H (in)
EWR 301000	Sediment / Carbon	Membrane	16" x 5.5" x 17"

How Reverse Osmosis Works:

Reverse Osmosis is the process that removes solid substances, minerals, and foreign contaminants from unfiltered or tap water. The reverse osmosis process eliminates chemicals, sediment, and inorganic materials like chlorine, salts, and minerals, also known as TDS or Total Dissolved Solids.

As pollution increases, more chemical contaminants are seeping into our water supply, such as pesticides, PFAS, cleaning products, and even pharmaceuticals requiring enhanced filtration to ensure the cleanest, purest and safest water available. Reverse Osmosis is the most common and affordable way to transform tap water into high-quality purified drinking water. Many popular store-bought bottled water companies use reverse osmosis technology to purify their bottled water.

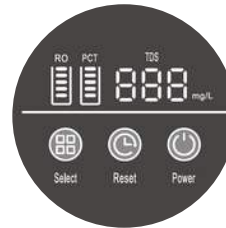

Additional Features:

- This is a tankless reverse osmosis system, saves you space
- For every gallon of water this reverse osmosis system produces, only one gallon is sent to drain.
- Quick connect filter & membrane are easy to replace
- Provides both drinking and purified water on demand
- Continuous flow
- Simple install and set-up
- System & faucet provides an outgoing TDS reading
- System light indicates filter/membrane life status and notifies you when they need to be replaced
- A light strip on the system indicates when the system is in Operation, Standby, or Auto Flush mode
- Internal booster pump provides high-purity water
- Requires electricity to operate
- A 15ft faucet communication cable is provided
-  certified
