EXCALIBUR - ULTRAFILTRATION SYSTEM

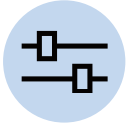

Quality through innovation

Ultrafiltration Drinking Water System

Your water may look clear, but all municipal water contains contaminants that can cause health issues. The Ultrafiltration System removes impurities such as benzene, chlorine, chloramines, dioxane, organic matter, pesticides, and many more from your drinking water. This system also removes any dirt or debris from your water, providing safe, clean water for you and your family.

Quick Connect Filter
Easy to Replace

Simple Install
and Set-up

Filters chlorine,
benzene & more

No Electricity
to Operate

*excluding consumables

Pure Tasting
Water

Tankless
'Space-saving'
Design

Creates No
Water Waste

Eco-friendly
Water Treatment

Part #	Flow Rate	Pressure Range (PSI)	Temp. (F)	L x W x H (in)
FH TH10UF	1.4 GPM	30-100	40-100	13 x 4 x 12

Cartridges: How do they work?

STEP 1 - Sediment Polypropylene: The first stage of filtration in this system will remove dirt, sand, and other sediment.

STEP 2 - Coconut GAC: The second stage of filtration in this system will reduce benzene, chloramine, dioxane, residual chlorine, pesticides, and odours.

STEP 3 - Hollow Fiber + Silver Carbon: The third stage of filtration in this system will remove a variety of contaminants such as chemicals & heavy metals.
